

ED'S BACK:

Hi all,
Following a lengthy absence, I'm happy to be back with the first newsletter for 2016. A great deal has happened since the last newsletter in particular additional improvements around the clubhouse and grounds. The clubhouse is looking better than before following painting of the roof, the traps and surrounding grounds are also looking great with the traps throwing consistent targets. Obviously, they require adjusting on occasion as we do before every competition. By the way, if anyone has any touch up paint, we need a little for the trap houses ☺!

For those that have not noticed, security cameras have been installed inside and outside the clubhouse so please smile while at WVCTC.

AGM:

The AGM held in March was attended by approximately 35 members. Nominations for committee positions were unopposed as such the 2015 committee remains mostly the same. James Strangis did not renominate for 2016 as he is currently building a home. We welcome Anthony Vacchione and Nino Pedulla to the committee, well done guys and pleasure to be working with you both.

A few matters were raised at the open forum, current memberships and practice cost for non members.

Currently we have close to 400 (399 to be precise), all ACTA members and still climbing, we are confident that the upgrades around the grounds

have contributed to the increase in memberships. Memberships continue to come in albeit at a reduced rate.

Practice cost for non-members was also raised and discussed at the next committee meeting when the decision was made to reduce fees to \$10 per round. We are sure this will be a welcomed change particularly from regular non-members.

NATIONALS:

The Nationals have been shot and won with 2 Werribee members shooting there way into the Macintosh teams. Junior Tom Armstrong and Kade Robertson shot extremely well to be included in the teams Travelling to Ireland. Congratulations to you both and hope you are again successful in Ireland. Well done to all Werribee members that competed at the Nationals!! The Results are as follow:
